

Animal Antics

Any number of players can play, though best with 2- 4 players.

Deal all the cards out to the players, make sure they are face down.

Players have to hold the cards facing up but in a deck, not fanned out. So only the top card is showing.

Then pick one player to read out a number from the top card. (e.g. weight, cuteness) and they put it down in the middle.

Then the other players read out their cards and put them down next to the card.

The one with the best or highest number is the winner. They collect all the cards and put them at the bottom of their pile.

They also choose a number from the next card. If there are two cards with the same number all the cards stay in the middle and the player tries again.

Whoever wins takes all of the cards!
