# Example Transition Words

## Addition

These are the words you use when you want to add more information to a point you've already made. Think of them as a way of saying, "And another thing..."

### Examples:

"Furthermore, the study also shows..."  
"Moreover, it's important to remember..."  
"In addition, we should consider..."

## Contrast

Sometimes, you need to show the flip side of the coin. They're your go-to when you want to say, "But on the other hand..."

### Examples:

"However, the results were not conclusive."  
"On the other hand, some experts argue that..."  
"Nevertheless, there is a need for further research."

## Cause and Effect

These transition words are crucial when you want to establish a relationship between two things, particularly when one is the result of the other.

### Examples:

"Because of the heavy rain, the match was postponed."  
"Therefore, we must reconsider our strategy."  
"As a result, the project was completed ahead of schedule."

## Sequence/Order

When you're laying out steps in a process or narrating events in the order they happened, sequence words are your allies.

### Examples:

"Firstly, gather all the necessary materials."  
"Subsequently, the data was analyzed."  
"Finally, we reached our destination."

## Example/Emphasis

Sometimes, you need to give your reader a concrete example to illustrate your point, or you might want to emphasize a crucial piece of information.

### Examples:

"For instance, the recent survey illustrates..."  
"In fact, 70% of respondents agreed that..."  
"Notably, this theory contradicts previous assumptions."

## Conclusion/Summary

Wrapping up your writing neatly is just as important as starting it well. Transition words for conclusions and summaries help you neatly tie together your ideas,

### Examples:

"In conclusion, the evidence clearly supports..."  
"To sum up, the key points are..."  
"Overall, it can be seen that..."
